

EUROSIX TWO PIECE RIDGE INSTALLATION GUIDE

TWO PIECE ADJUSTABLE RIDGES

EUROSIX two piece adjustable ridges are suitable for roof pitches from 10° to 40°. Our EUROSIX two piece ridges cover a width of 1016mm which is identical to the EUROSIX sheeting. Ridges and sheets should be fixed into the top purlins (Fig.1).

Dimension C for 2 Piece Ridges

Pitch (A) Purlin Depth (B)

	75mm	125mm	175mm	225mm
10	152	143	134	125
12.5	146	135	124	113
15	140	127	113	100
17.5	134	118	102	87
22.5	121	100	80	59
30	100	71	42	-
40	66	24	-	-

2 Piece Close Fitting Ridge

Fits into corrugations of EUROSIX sheeting and closes gap at ridge section.

2 Piece Ventilating Ridge

Suitable for continuous or part ventilation in combination with close fitting ridges. Continuous use requires a pair of close fitting ridges sited at each end of the run (start and finish of ridge detail).

2 Piece Plain Wing Ridge

Offers minimal ventilation and sits on top of EUROSIX sheet corrugations.

Note: These ridge types may not be suitable for buildings that require a large volume of ventilation or airflow. Please contact our technical department for specialist advice.

EUROSIX TWO PIECE RIDGE INSTALLATION GUIDE

LOCATING TWO PIECE RIDGES

When locating 2 piece close fitting ridges, ensure the small roll under the ridge is sited on the slope sheeted left to right and the large roll is sited on the slope sheeted right to left, this ensures that the laps of the ridge align correctly with the laps of the sheets.

If the 2 piece close fitting ridges is sited the opposing way then the lap of the ridge must be offset 1 corrugation from the lap of the sheets.

EUROSIX FINIALS

Briarwood offer EUROSIX Finials to close the ridge at each gable end of the building. Disc Finials should be used in combination with plain wing and roll top bargeboards (or where bargeboards are not being used) and 2 piece hooded finials should be used in combination with roll top bargeboards.

The Finials do not fit on the socketed end rather sit at the main body of the two piece ridge, we therefore recommend that you offset the ridges as previously mentioned. Diamond Finials can be used with any bargeboard type.

The Disc Finials must be seam bolted to the inner roll of the ridge before fitting the outer roll.

Disc and Diamond Type Ridge Finial
